

Using the Strata Kitchens Design Tool

The Strata Kitchens design tool gives you the freedom to create (and re-create) your dream kitchen—and easily! Our handy grid can be used with the scaled cut-out cabinets and once you settle on a design, simply stick them down.

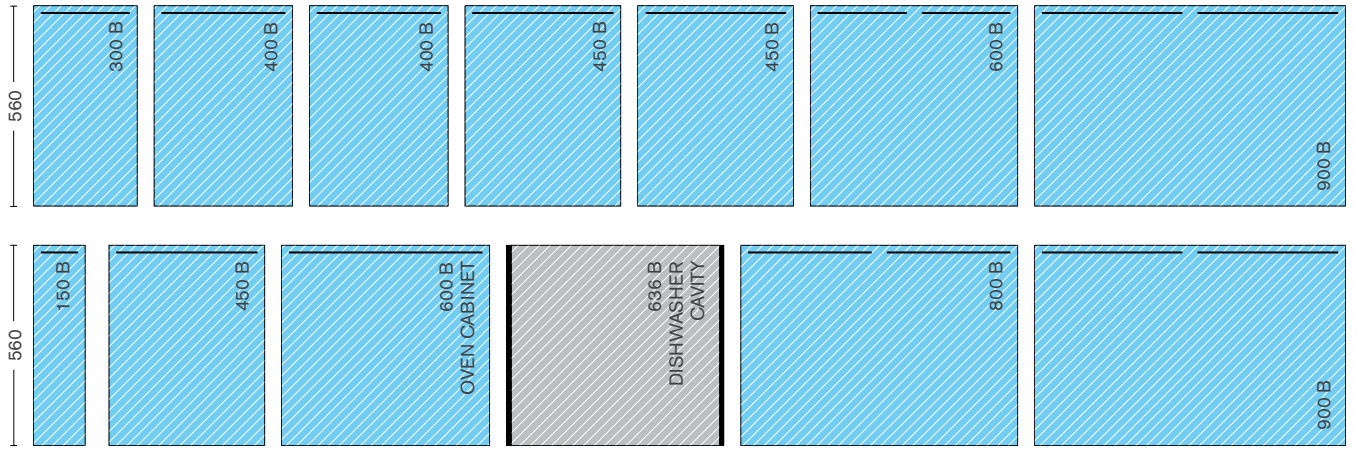

The image below shows the Loft kitchen, featured in our 2010 Look Book, as an example of how to design your kitchen with the tool.

If you get stuck at all, feel free to call our team on FREECALL 1800 28 26 24 or alternatively you can fax through your kitchen plan to FREEFAX 1800 77 87 74 for our designers to look over and provide any feedback.

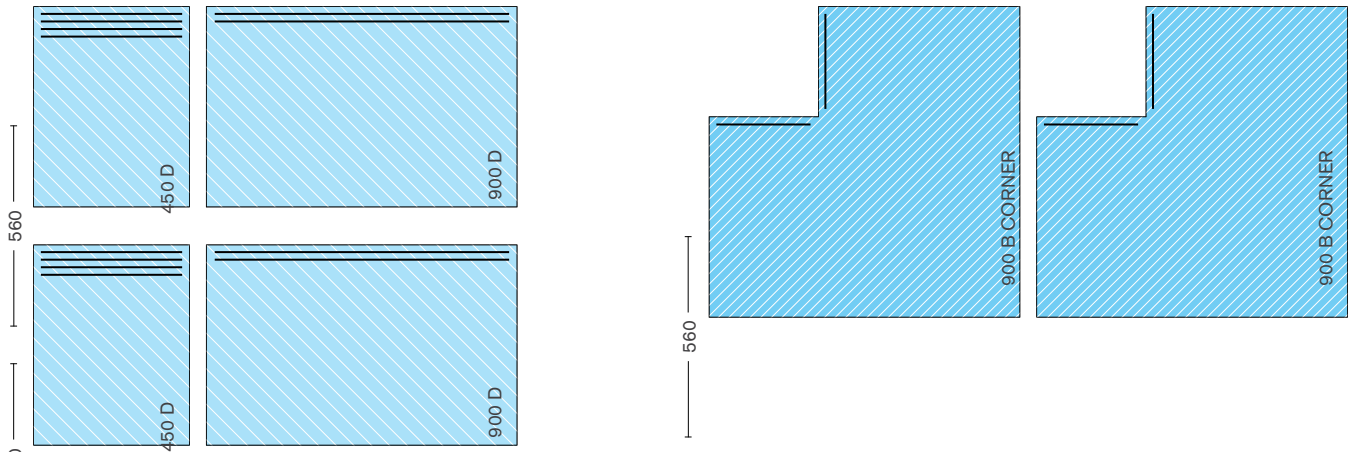

Handy tip! Remember to allow 18mm for each end panel to finish off exposed cabinet ends.
